

Bee City USA - Rome

Report on 2021

Pollinator Habitat Creation & Enhancement

Assisted with a pollinator garden installation at a trailhead, including educational signage

Students assist with installation of native plants at trailhead

Completed garden at trailhead

Education & Outreach

Hosted: -Bee/pollinator education program talks at 2nd Avenue Baptist Church, including what pollinators do, habitat needs, pollination process, etc. -Library story time & educational activities for youth (and parents) -Bee Fest/National Pollinator Week at farmers' markets, promotional materials, native plant lists/sales, kid crafts, etc.

Representative with a kid's craft station during Bee Fest

Policies & Practices

Used events and programs to educate the public on pollinator-friendly pest management actions, including alternate pesticide options. Worked with those who help maintain plots and gardens to ensure using best practices for pollinators.

Integrated Pest Management Plan:
