

Bee Campus USA Annual Report for 2018 Pollinator Conservation & Education

Morehead State University Morehead, Kentucky

EDUCATION & OUTREACH

Earth Day festival - April 20th, 2018

POLLINATOR HEALTH & HABITAT

Volunteers and committee members cleaned up and maintained our two outdoor classrooms where our monarch waystations are.

POLICIES & PRACTICES

Our committee has shrunk over the past year due to many people leaving our campus due to budget cuts. Our landscape director follows our pollinator friendly campus plan. Dr. O'Keefe teaches students how to type pollen in honey, our horticulture supervisor manages our bee hives at our farm and Holly Niehoff facilitates outreach and campus planting and cleanup days in the outdoor classrooms.

Recommended Locally Native Plant Species List–

SERVICE-LEARNING

May 4--Planted more milkweed seeds, cleaned up and mulched the outdoor classrooms.

April--Students in our education program learned how to teach lessons based on project wild in the outdoor classroom.

CURRICULUM

Dr. Jen O'keefe gave a workshop at the Licking River Bee Keepers Association annual workshop event about her work typing pollen in honey. Our horticulture class teaches how to take care of honeybees at our farm hives.

EDUCATIONAL SIGNAGE

We did not install new ones but used the same ones from last year.
