

Bee City USA Annual Report for 2018 Pollinator Conservation & Education THOUSAND OAKS, CALIFORNIA

EDUCATION & OUTREACH

Thousand Oaks hosted a pollinator friendly garden and native tree planting to celebrate Arbor Earth Day, where Garrett Crawford also gave an “Ask an Arborist Talk.” Photos: Garrett Crawford

POLLINATOR HEALTH & HABITAT

The City of Thousand Oaks worked with a local Boy Scout troop to plant a native pollinator garden at the City's Library and our annual tree planting project with volunteers. It was a great event, with lots of education on why we were planting the specific plants and how they benefit pollinators. Photos: Garrett Crawford

POLICIES & PRACTICES

Our committee is made up of City employees dedicated to helping pollinators. We educate the public as often as we can. We educate City staff and the public on pollinator matters. We also work with volunteer groups to create habitat projects and give talks on the benefits of pollinator and how to coexist with them. We are working with Community Development to integrate our Recommended Species List and Integrated Pest Management Plan into Thousand Oaks' planning documents. Our policies are in the process of being updated and reviewed.
