

Bee City USA - City of Hahira

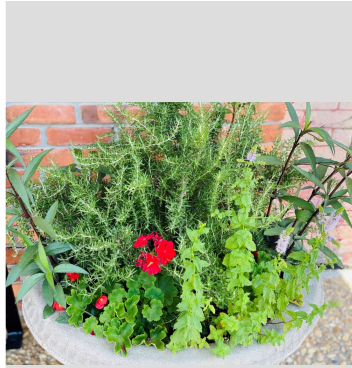

Report on 2021

Pollinator Habitat Creation & Enhancement

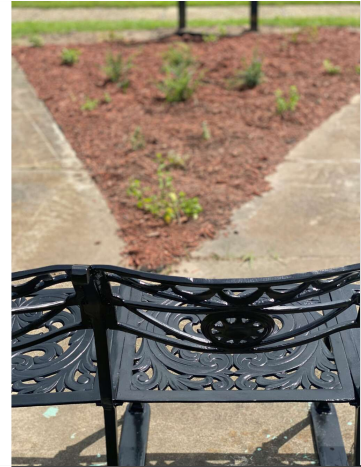

Over 465 square feet of pollinator habitat creation was completed in Hahira in 2020. This included a downtown alley way, the trees on Main Street in downtown, a public park, the front garden at City Hall, our downtown planters and a large planter at our city center.

Education & Outreach

We welcomed the 2020 American Honey Princess, Sydnie Paulsrud, to Hahira. She attended one of our Farmers Markets where she set up a tent and gave out honey samples and information regarding bees and natural pollinators. In celebration of Earth Day 2020, the Hahira Main Street Department gave away free biodegradable pots, organic soil, and packets of Bee Feed to the community.

Policies & Practices

The habitats that have been created for area pollinators are not subject to chemicals or pesticides. These area are maintained by volunteers through weeding the gardens by hand.
