

Bee City USA - Dunwoody

Report on 2021

Pollinator Habitat Creation & Enhancement

Members from the committee assisted with two City of Dunwoody events, a Native Tree Planting in Brook Run Park on Martin Luther King Jr. Day and on Arbor Day.

Volunteers planting trees on Martin Luther King Jr. Day.

Education & Outreach

The Dunwoody Nature Center hosted the annual Butterfly Experience, which was spread across multiple days from August 19 to August 22. The Butterfly Experience provided activities, crafts, and educational experiences centered around butterflies for all ages. Members of Bee Dunwoody were present.

Bee Dunwoody's Pollinator Pledge

Yes! I will do my best to maintain my land to protect and promote the health of pollinators, including bees, butterflies, birds, etc. by caring for our local ecosystem in these sustainable ways:

1. Growing pollinator-friendly, preferably native, plants, shrubs, and trees.
2. Protecting bee nests and caterpillar host plants.
3. Using plants, or seeds of plants, that are not treated with neonicotinoids, which are toxic to pollinators.
4. Foregoing the use of broad pesticides, especially insecticides such as mosquito spraying for lawns.
5. Talking to others about the importance of pollinators and their habitat.
6. Supporting pollinator-friendly businesses whenever possible.
